

Trimble® Accubid LiveCount™ Software

Periodically, Trimble provides interim software releases that include modifications and enhancements to our software applications. We are pleased to announce the **3.0.5 release** for our **LiveCount and LiveCount Pro** software products. This document provides you with important information pertaining to the feature modifications included in this release of our software.

Release 3.0.5 Features

Trimble® LiveCount™ Server Compatibility

The LiveCount Server is a utility installed and run on your network server, allowing you to have a central location for LiveCount database files, which will greatly increase performance.

If you have five or more estimators using the LiveCount database concurrently, Trimble recommends moving to the LiveCount Server. This will substantially increase software performance, allowing for faster completion of LiveCount processes.

Note: The LiveCount Server is a separate product, requiring a separate license. The cost of the LiveCount Server license is *not* included in the base price of LiveCount. Please contact your Trimble sales representative for more information.

Trimble® Accubid Classic, Version 12, Compatibility

This release of the Trimble Accubid LiveCount software is compatible with the Trimble® Accubid Classic Estimating and Trimble® Accubid Classic ChangeOrder programs.

LiveCount Software Installation Notes

LiveCount

You will need to uninstall you existing LiveCount before you install THE LiveCount, version 3.0.5, software update. Trimble recommends you backup up your LiveCount data files before upgrading to the LiveCount version 3.0.5 software.

- LiveCount3.0Standards.ctr

LiveCount Server

If you choose to move to the LiveCount Server application, a detailed installation document is available. This document outlines the steps required to properly install the server application, as well as connecting workstations to the network database.

Trimble recommends that you follow the instructions outlined above to ensure proper behavior of your software after installation and configuration is complete.

This document is for informational purposes only and is not a legally binding agreement or offer. Trimble makes no warranties and assumes no obligations or liabilities hereunder.
