

# Release Notes

## Version 11.0.1

Periodically, Accubid provides interim software releases that include modifications and enhancements to our software applications. We are pleased to announce the **11.0.1 release** for our **classic software product line**. This document provides you with important information pertaining to the feature modifications included in this release of our software.

### Estimating

- The option to select different method of calculating Labor Overhead on Final Pricing screen is once again available in the BidWinner and BidWinner Plus tiers of the software.
- Probe settings now makes reference to LiveCount 3 (rather than 2.5).
- An option to *not* auto link count and length values from LiveCount™ is now present in the software.
- LiveCount based designation takeoffs that were reversed are now updated with the correct quantity after adding points (no longer produces positive results).
- When you go to Job > Save As, the All options checkbox is now selected by default.
- The LiveCount Resync functionality now includes Adder lengths.
- Hours and costs are no longer included in summary rows when exported to the mpx format.
- The Save As command now clears references to the original LiveCount project on Designations.

### ChangeOrder

- Direct and Indirect Labor screens: The Rate column is not alarmed when *Full Cost* > 0.00 and *Rate* = 0.00.

### Time &Material Billing

- The schedule screen now loads as expected after selecting any quarterly schedule filter copied from the company template (or any other company).
- In some cases, a *Fixed System Out Of Memory* error was generated on migrations from v9 to v11. This issue has been resolved.
- Loading the application after converting a migrated company from v10 to v11 that has an invalid (null) month in a Filter now works as expected.
- The status in the header /title for work order reports has been removed.

### Database Manager

- When printing common assemblies, Fct2 prints correct amounts (as displayed on screen).
