Trimble® Field Fitting Input on the Apple iPad®

The Trimble Building Construction division is excited to announce the release of Trimble Field Fitting Input for HVAC Sheet Metal Contractors and Fabricators.

This iPad® app allows contractors in the field to quickly collect accurate fitting dimensional data to send from the job site back to the fabrication shop and into their Vulcan® CAM software.

By using the Trimble Field Fitting Input app, field personnel can reduce or eliminate errors resulting from incorrect dimensions collected from hand drawings. Additionally contractors will be able to utilize standard company defaults and fittings from their Vulcan® CAM software in their Trimble Field Fitting Input app. When all fitting dimensional data is entered, users can easily send the information via email back to the fabrication shop for import into their Vulcan® CAM software.

The Trimble Field Fitting Input app is available through the Apple iTunes & App stores and is free to download. To import data from Trimble Field Fitting Input into Vulcan customers will require additional licensing through Vulcan's licensing system and users must be using the current shipping version of Vulcan. To upgrade to the current version of Vulcan call 800-441-2840 or e-mail camsupport@quickpen.com.

Trimble® Field Fitting Input Features & Benefits

Feature	Benefits
Designed to be similar to our CAM software, Trimble Field Fitting Input is a simple graphical user interface designed for the Apple® iPad®.	Easy to learn and use by a wide variety of personnel.
Shop Specifications Import	Field personnel can easily switch between different pressure needs when managing multiple job sites.

Trimble Building Construction Division, 10355 Westmoor Drive, Westminster, CO 80021, USA

Feature	Benefits
Data is input directly in the field and transmitted via email to the shop for import into Vulcan CAM software.	Time and errors are significantly reduced.
Customers are able to import different scope lists to easily define information for fittings that will be grouped and installed on the jobsite.	Field Scoping provides valuable information such as Drawing, Floor & System on each CAM label. This information increases productivity in delivery and installation process.
WiFi and/or wireless connectivity	Field fittings can be emailed from the field to the shop, shortening the fabrication to job site delivery.

Trimble® Field Fitting Input App Store Link

Download the free app from the Apple® App Store by selecting the link below:
