

## Trimble® Accubid Time & Material Billing | 12.6 Release Notes

Periodically, Trimble provides software releases that include modifications and enhancements to our software applications. We are pleased to announce the **Version 12.6 release** for our **Time & Material Billing** software product. This document provides you with important information pertaining to the feature modifications included in this release of our software.

### Compatibility

The Time & Material Billing software, version 12.6, software is compatible with the following applications:

#### Trimble® Work Management software

Integrated into the Trimble® Accubid Time & Material Billing software:

Provides intelligent scheduling tools for those companies with a mobile workforce.

**Note:** *If you are upgrading from a Time & Material Billing version prior to 12.5, please contact MEP Client Services at 1-800-361-3030 or [accubidsupport@trimble.com](mailto:accubidsupport@trimble.com) before proceeding.*

### Installation Information

- **New Customers**

If you are a new customer, please refer to the *Trimble Accubid Time & Material Billing Installation Guide* included with your software package. This guide walks you through the steps required to install and starting using the Time & Material Billing software.

- **Update Customers**

If you are updating from a previous version of the Trimble Accubid Time & Material Billing software, please contact MEP Client Services before installing this update.

**Email**      [accubidsupport@trimble.com](mailto:accubidsupport@trimble.com)

**Phone**      1-800-361-3030

### Modifications

#### Time & Material Billing Software

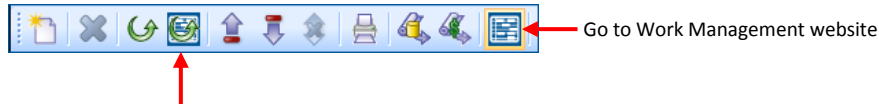

- To help streamline input, the Company Information dialog has been modified. The Identification and Reference Column tabs have been combined into one tab: *Reference and Identification*. The information required on this tab mirrors the two previous tabs.
- In order to manage Work Management parts catalogs within the Time & Material Billing software, a new menu command is now available on the Database menu: *Work Management Parts Catalogs*. This allows you to add, remove, or view catalogs available in the Time & Material Billing application.

**This document is for informational purposes only and is not a legally binding agreement or offer.  
Trimble makes no warranties and assumes no obligations or liabilities hereunder.**

- The validation for phone numbers and email addresses was removed. Customers who had previously added this data to the Time & Material Billing prior to the validation experienced issues with due to non-conformance of older data.
- If you are using the Work Management system in conjunction with the Time & Material Billing software, the following fields now automatically populate:
  - Org Units
  - Capabilities
  - Employees

**Note:** These fields pull directly from the Work Management application.

- New buttons are available on the main Time & Material Billing toolbar.

Update the status of jobs from Work Management

**Note:** *These toolbar buttons are not available if you are not connected to the Work Management system in the Time & Material Billing application.*

## Database Manager

A new column is available in the Database Manager allowing you to select items for inclusion in a catalog that can be exported to the Work Management application. The field technician is then able to select these items as necessary. For example:

- When you take off these items in the Time & Material Billing software and send a job to the Work Management system, the items will be available in the mobile application (used by the technician).
- The technician selects the items used on the job so these can be properly included in the billing produced by the Time & Material Billing software.
