

## Trimble® Field Points v3.1 | Release Notes

Periodically, Trimble provides interim software releases that include modifications to our software applications. We are pleased to announce releases of the **Trimble Field Points** software product as follows:

- **Version 3.1** - *Compatible with Autodesk® AutoCAD® 2016 and Autodesk® Revit® 2016*

This document provides you with important information pertaining to the enhancements and/or modifications included in this release of our software.

### AutoCAD Compatible Applications

- Multiple User Coordinate systems (UCS) is now supported on both Export and Import
- .CSV File Export to Trimble Field Link no longer requires additional external manipulation
- Windows 10 Compatibility

### Revit Compatible Applications

- Shared Coordinates are now supported for both Export and Import
- When placing points 'Object Snap' is replaced with 'Work Plane' to more accurately represent the command
- When selecting points for export 'Select Entire Model' is changed to 'Select All From Current View' to more accurately represent the command
- Custom Point selection is now visually represented while placing points on a Revit Family
