Introduction

These Release Notes describe the enhancements that are new in version 2.4.0 of the MEP software.

New Features

Wireless LAN Connection Improvements

The latest version of Trimble MEP includes changes to increase the connection reliability with the Trimble RTS555 robotic total station. The RTS555 transmits a peer-to-peer (ad-hoc) wireless network and the Windows Mobile® 6.1 operating system of the Trimble Nomad® favors connecting to access point (infrastructure) networks. Trimble MEP 2.4.0 changes the wireless LAN configuration to enable peer-to-peer network support of the Nomad to ensure that Trimble MEP will detect and connect to the RTS555.

Language support

Trimble MEP 2.4.0 is available in:

- English

- Chinese (Simplified)
- Dutch
- French
- German
- Japanese
- Korean
- Russian

A separate installer is provided for each language.
